Dear [Hiring Manager],

As a former intern at Samsung PRISM R&D, I've had hands-on experience developing and validating speech audio quality enhancement techniques such as noise reduction, signal optimization, and verification testing.

This role deepened my appreciation for precision engineering in real-time audio applications. I'm now looking to build on this foundation and contribute to audio-focused development environments, particularly in signal processing, real-time audio analytics, or media software development. I bring with me a solid understanding of digital audio pipelines, and a passion for clarity, innovation, and user experience.

Thank you for considering my application.

Sincerely,

Vigneshwar Reddy Gangireddy
