Dear [Hiring Manager],

With a passion for intelligent systems and a background in both traditional ML and deep learning techniques, I'm seeking a position that allows me to grow as an AI/ML Engineer. My academic projects-including Disease Prediction Using Machine Learning and Smart Assistance for Visually Impaired (YOLO + RNN-based)-demonstrate my ability to apply machine learning algorithms to real-world challenges.

I've actively contributed to KL University's AI/ML club, mentoring peers and leading workshops on deep learning and model training. My technical stack includes Python, Jupyter, Google Colab, R, and foundational experience with AI frameworks.

I'm enthusiastic about contributing to impactful AI-driven solutions and learning alongside industry professionals.

Sincerely,

Vigneshwar Reddy Gangireddy
